Journal of Engineering Mathematics

Contents of Volume 26 (1992)

Vol. 26 No. 1 February 1992

Special 25th Anniversary Issue
Problems in Applied, Industrial and Engineering Mathematics

Twenty-five years of Engineering Mathematics v

F.H. Busse and R.M. Clever: Three-dimensional convection in an inclined layer heated from below 1

H.W. Hoogstraten, H.C.J. Hoefsloot and L.P.B.M. Janssen: Marangoni convection in V-shaped containers 21

H.K. Kuiken: Structure of the temperature profile within a high-pressure gas-discharge lamp operating near maximum radiation efficiency 39

J.N. Newman: The Green function for potential flow in a rectangular channel 51

S.W. Rienstra: A note on the Kutta condition in Glauert's solution of the thin aerofoil problem 61

N. Riley: Free convection from a vertical cooling fibre 71

J.A. Moriarty and L.W. Schwartz: Effective slip in numerical calculations of moving-contact-line problems 81

D.J. Doorly and F.T. Smith: Initial-value problems for spot disturbances in incompressible or compressible boundary layers 87

A.J.M. Spencer: Plasticity theory for fibre-reinforced composites 107

A.E.P. Veldman and K. Rinzema: Playing with nonuniform grids 119

A.I. van de Vooren: The Stewartson layer of a rotating disk of finite radius 131

J.V. Wehausen: Causality and the radiation condition 153

H.J. Weinitschke and H. Grabmüller: Recent mathematical results in the nonlinear theory of flat and curved elastic membranes of revolution 159

L. van Wijngaarden and J. Buist: The emission of sound by statistically homogeneous bubble layers 195

R.W. Yeung and P. Ananthakrishnan: Oscillation of a floating body in a viscous fluid 211

L.J.M. van de Klundert, E.M.J. Niessen and P.J. Zandbergen: Electromagnetic response of composite superconducting wires 231

Vol. 26 No. 2 May 1992

Obituary: Professor H.J. Weinitschke iii

P.A. Martin: Havelock wavemakers, Westergaard dams and the Rayleigh hypothesis 267

A. Foriero and B. Ladanyi: The use of fractional exponential creep kernels for long-term behavior of laterally loaded piles in permafrost 281

P.D. Wadey: On the development of Görtler vortices in wall jet flow 297

A.A. ten Dam: Stable numerical integration of dynamical systems subject to equality state-space constraints 315

W.-S. Hwang and A.T. Chwang: The swirling round laminar jet 339

S.A. Kinnas: Inversion of the source and vorticity equations for supercavitating hydrofoils 349

Vol. 26 No. 3 August 1992

S.I. Chou: Temperature distribution in a bi-material body with a line of cracks under uniform heat flow 363

J. Shi: Plane deformations of shear-resisting membranes formed of elastic cords 379

E.M.J. Niessen, L.J.M. van de Klundert, R.M.J. van Damme, F.P.H. van Beckum and P.J. Zandbergen: Coupling losses in superconducting, torus-shaped wires due to applied magnetic field changes 395

M.C. Ece: The initial boundary-layer flow past a translating and spinning rotational symmetric body 415

C. Liang and C.A. Rogers: A multi-dimensional constitutive model for shape memory alloys 429

A.M.J. Davis: Discussion related to Watson and Evans: "Resonant frequencies of a fluid in containers with internal bodies" 445

Vol. 26 No. 4 November 1992

G.C. Hocking and L.K. Forbes: Subcritical free-surface flow caused by a line source in a fluid of finite depth 455

P.A. Martin: Tip behaviour for cracks in bonded inhomogeneous materials 467

S. Chellam, M.R. Wiesner and C. Dawson: Slip at a uniformly porous boundary: effect on fluid flow and mass transfer 481

P.G. Daniels and R.J. Gargaro: Numerical and asymptotic solutions for the thermal wall jet 493

A.M. Boriek, A.S. El-Bakry and C.D. Armeniades: A mathematical model and numerical estimation of setting stresses in polymer composites molded under hydrostatic pressure 509

A. Ridha: On the dual solutions associated with boundary-layer equations in a corner 525

P. Wilmott and A.D. Fitt: A composite cavity model for axisymmetric high Reynolds number separated flow I: modelling and analysis 539
